# Integration Services

## Fundamentals First

When it comes to the success of your solution, delivering it completely configured, customized and tested is paramount to ensuring end-customer satisfaction. In a competitive market, customers expect to experience only the best possible outcomes with the highest quality of products — and you need to deliver.
A well-resourced integration partner like Shyft Global Services can help you make sure the preparation, deployment and integration of your products are done right — every time — so you can focus on what's next for your business.

## Assemble, Integrate and Test

From designing a solution to first article builds all the way to complex converged assembly and advanced testing, we take your concept from inception to creation. Our integration facilities in the United States and Canada are certified to ISO 9001:2015 and ISO 13485:2016 standards, each with more than 150 workbenches and more than 80 engineers who hold more than 2,500 industry-recognized certifications. This ensures your systems are assembled, integrated, configured, customized and tested by the best in the industry. Integration services include:

- ▶ Architect solution
- ▶ First article build
- ▶ Design validation
- ▶ Build to order (BTO) – blades, chassis, servers
- ▶ Rack assembly, multi-vendor solution integration
- ▶ Routers, switches and wireless integration
- ▶ Cable management

- ▶ Load custom imaging, applications and OS
- ▶ Endpoint device configuration
- ▶ Customization
- ▶ Spare parts management
- ▶ Project management
- ▶ Testing and prototyping
- ▶ Forward logistics

### Leverage our Supply Chain Expertise

Customers prefer to do business in different ways across various markets, and they need services that can respond and adapt accordingly. Whatever logistics model you prefer — from third-party logistics to comprehensive fulfillment and more — you can leverage the infrastructure of a world-class distribution and logistics expert to meet and exceed your business's unique needs. We provide you with delivery, installation, integration, and related services responding directly to the way customers prefer to do business beyond distribution.

### Warehousing and Logistics Simplified

With warehouses strategically located around the world, we can keep your products close to customer locations until delivery, no matter where they're located. Committed to helping customers properly manage assets, we also apply asset tags supplied by the customer or Shyft to inventory.

### When Your Name is on it, Trust Ours

Your name and reputation are on the line when you provide services. You can provide your customers with the solutions they need — customized and integrated in the way they want — using a team with global reach, deep technology expertise and supply chain regulatory compliance. Moving your services to Shyft offers you instant scalability with off-payroll resources, freeing your technical resources for far more complex, more profitable, work.

## About Shyft Global Services

Shyft Global Services is a leading technology lifecycle service provider that partners with companies around the world to shift the way they do business. Powered by a robust global logistics network, team of outsourcing experts and decades of experience, Shyft's end-to-end product and customer lifecycle services enable technology companies to reinvest in growth, transformation and innovation.
