

CenterPoint Facility Groveport, Ohio

Welcome to CenterPoint

CenterPoint Facility Certifications

The Shyft Global Services business was built to support yours, and we have continually developed, maintained and improved our Quality, Environment, Health and Safety (QEHS) system for over three decades.

Our 586,000 sq. ft. CenterPoint facility in Groveport, Ohio is compliant with numerous industry standards, including:

- ▶ ISO 9001:2015 Quality Management Systems
- ▶ ISO 14001:2015 Environmental Management Systems
- ▶ ISO 13485:2016 Medical Devices

Why CenterPoint?

Complementary Services: Our state-of-the-art, certified CenterPoint facility provides a full complement of product lifecycle services under one roof, and we are committed to continually evolving and delivering higher value to both you and your customers.

Strategically Located: Every Shyft facility is strategically located to ensure ready access to major transportation hubs, helping to move technology quickly to your customers.

Capital Release: The systems and tools, highly trained experts and program-management capabilities employed in our CenterPoint facility give you the freedom to focus on the road ahead while still giving your customers the high-quality services experience they deserve.

Repair Center

Shyft's comprehensive repair services cover the full spectrum of products, from data center to client to specialty embedded technology — and more — to help you deliver a best-in-class repair experience to your customers. Our repair operations support a variety of technologies and industries, including but not limited to storage, networking, medical, broadband and point of sale.

Integration Center

From endpoint devices to complex rack-mounted systems, Shyft's integration services enable you to increase your profitability, scale quickly and give your customers the products and solutions they're looking for without investing in additional headcount or infrastructure.

Supply Chain Management

With specially designed operating models, Shyft's purpose-built, global supply chain management services strengthen every link of your supply chain so your products can flow seamlessly to your customers.

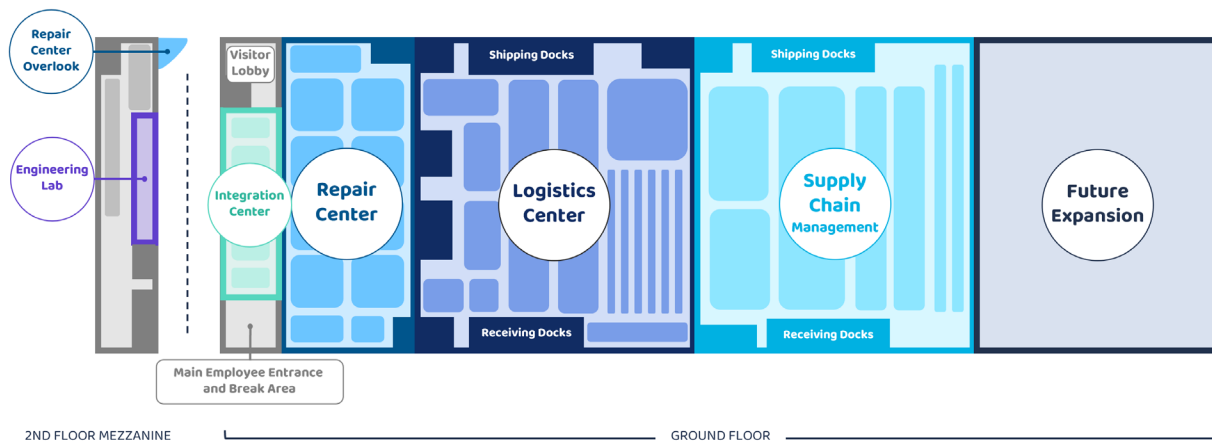

Engineering Lab

Utilizing best practices and efficient project-management capabilities, our expert engineers produce and test solutions to operationalize programs that reduce complexities and meet unique customer needs.

Logistics Center

Our logistics centers help you modernize your logistics network and generate long-term success with inventory management, delivery, supply chain logistics and responsible recycling practices that save your organization time and money while reducing risk.

Entrust your services operations and reverse logistics to Shyft and ensure your customers are continuously operational and satisfied. One shift is all it takes.
