

# Services for Data Center Solutions

## Designing Solutions for the Modern Data Center

Emerging technologies are driving unprecedented innovation in data center infrastructure. Whether developing server, storage and networking solutions, cybersecurity solutions, AI-powered solutions or power and cooling systems, companies innovating for the modern data center have an extraordinary opportunity before them. But the pace of change is also introducing new challenges. Interoperability and time to market are of the essence to support complex, multi-vendor environments at scale.

Whether destined for traditional, hybrid or high-performance computing (HPC) data centers, technology solutions must function flawlessly in the environment in which they're deployed. To ensure optimal performance, solutions must be validated, integrated, deployed and supported across the full product lifecycle. Aligning innovation with operational execution ensures that what works in theory will succeed under pressure, over time and at scale. Operational finesse is a competitive differentiator.

Shyft Global Services revolutionizes how products are integrated, delivered, maintained and sustained in the AI era and continuously evolving technology landscape, enabling smarter planning and inventory management, faster integration and global lifecycle orchestration from design through disposition.

---

## Prioritize Innovation and Operationalization

From optimizing solution development and accelerating deployment cycles to streamlining global operations, you can unlock value at every stage of the data center technology lifecycle by leaning on Shyft.

### More Focus on Innovation

Leverage a global infrastructure and ecosystem to maximize your solution and design for production at scale — without sacrificing innovation.

### Simplified Operations

Streamline global logistics and services with a single partner to ensure multi-vendor operational compatibility and supply chain planning flexibility.

### Enhanced Customer Experience

Deliver easy-to-support solutions with seamless orchestration, tailored deployment and global technical support to exceed customer expectations.

### Accelerated Time to Cash

Speed up delivery and time to value with validated solutions, flexible supply chain models and engineering support that also maximizes ROI.

## Tap Into Seamless Data Center Solution Delivery

Lean on Shyft as an extension of your team for end-to-end product lifecycle support and multi-vendor expertise.

### Key capabilities include:

- ▶ Global supply chain orchestration
- ▶ Inventory optimization and strategic spares
- ▶ Rack integration, configuration and customization
- ▶ AI-ready infrastructure assembly and system-level testing
- ▶ Global multi-site rollouts
- ▶ Onsite installation, commissioning and smart hands
- ▶ 24x7 managed services
- ▶ Staff augmentation and on-demand engineering
- ▶ Advanced diagnostics and reliability engineering
- ▶ Depot repair, refurbishment and lifecycle extension
- ▶ NTF validation and quality assurance testing
- ▶ Customer success and technical support
- ▶ ECO upgrades

## Delivering Technology Solutions in the AI Era

Whether delivered on premises, in the cloud or in dedicated facilities, data center technology and solutions continue to evolve as companies balance everyday workloads and the high-density computing that keeps them competitive today. Solutions designed for deployment in traditional and HPC environments alike are advancing to accommodate new architectures that are complex and tightly integrated, requiring solutions to not only perform flawlessly, but to do so in conjunction with others.

Mastery across infrastructures, technologies and brands means you can rely on Shyft to help you design, validate and support products in the most complex multi-vendor data centers.

- ▶ Expertise in multi-vendor solutions, inventory management, repair, engineering and more
- ▶ Integration, design validation and maintenance for AI workloads
- ▶ Mastery across infrastructures, technologies and brands
- ▶ Data center modernization support
- ▶ Lower total cost of ownership
- ▶ Environmentally responsible

## About Shyft Global Services

Shyft Global Services is a leading technology lifecycle service provider that partners with companies around the world to shift the way they do business. Powered by a robust global logistics network, team of outsourcing experts and decades of experience, Shyft's end-to-end product and customer lifecycle services enable technology companies to reinvest in growth, transformation and innovation.
